

# Rapid Antigen Test Results Flow for Workplaces

## Negative

Confirm result

Dispose in appropriate waste

Staff proceed to work

Staff to self-monitor

## Positive

### SUPERVISOR

Confirm positive RAT result

Reassure positive staff, ensure they isolate, and provide them the Positive RAT information sheet

Once positive staff is offsite, remove PPE according to guidance (doffing PPE chart provided)

Ensure positive waste is appropriately discarded

Complete screening of remaining staff after donning clean PPE

Ensure cleaning is undertaken to meet local requirements

### EMPLOYEE

Isolate from group and put on a mask (N-95 mask if available)

Receive Positive RAT information sheet

Report RAT result to QLD health (see information sheet provided)

Go home, isolate and follow public health advice

When cleared to return to work, notify relevant manager

### MANAGER

Support positive employee and ensure they are able to self-isolate

Maintain record of positive results

Debrief staff while maintaining employee privacy

Ensure any PCR result of RAT positive individual is reported if received

## Invalid

Discard test

Review instructions

Redo test

In the event of a second invalid test, speak to your testing supervisor
